AT THE REQUEST OF
Referrer: ALLURI, KRISHNA C, MD
Address: 2130 NE LOOP 410, STE 100
SAN ANTONIO, TX 78217

Name: Karen Claybourne
DOB: 1/11/1966
Gender: Female
Acc #: 55821306
Exam Date: 8/8/2025 12:39 PM
Exam Name: MR BRAIN W,W-O CONTRAST | 70553

EXAMINATION: Brain MRI without and with IV contrast.

HISTORY: 59 years Female C3431: Malignant neoplasm of lower lobe, right bronchus or lung

TECHNIQUE: Multiplanar multisequence magnetic resonance imaging of the brain was performed without and with IV contrast.

CONTRAST: 19 cc IV Dotarem.

COMPARISON: None.

FINDINGS:

Brain: Heterogeneously enhancing 1.2 x 1.2 x 1.4 cm (CC X AP X T) mass in the nodule of the cerebellum with moderate surrounding edema, most suggestive of metastasis given the history. Minimal susceptibility artifact suggesting hemorrhage or calcification. Fourth ventricle is not effaced. No evidence of hydrocephalus. Rest of the brain parenchyma is unremarkable. No other enhancing lesion is seen. Recommend further evaluation and follow-up. No acute infarct or hemorrhage.

Ventricles: Unremarkable for age.

Orbits: Unremarkable

Paranasal sinuses: Clear as visualized.

Mastoid air cells: Clear as visualized.

Bones: Unremarkable.

Soft tissues: Unremarkable.

IMPRESSION:

Solitary enhancing 1.4 cm metastasis in the nodule of the cerebellum with surrounding edema. Minimal susceptibility artifacts suggesting age-indeterminate blood products within the lesion. Close follow-up with CT is recommended. No mass effect. No hydrocephalus.
